To Kill a Mockingbird Characterization & Quotation

Directions: Locate and jot down a quote that exemplifies one of the indirect characterizations (speech, thoughts, effects, actions, looks) in the "quote" column. Write which type of indirect characterization it is in the "type of characterization" column. Then in the last column describe what you learn about the character described in the quote. Remember, don't just explain what the quote is saying *directly*, instead describe what you are *indirectly* learning.

Quote	Type of Characterization	What does this tell us about the described characters? What does this tell us about other characters?
